

## BUILDING LOCATION VERIFICATION SURVEY

COMMUNITY DEVELOPMENT DEPARTMENT  
8130 Allison Avenue, La Mesa, CA 91941  
Phone: (619) 667-1177 • Fax: (619) 667-1380

### PERMITTEE ACKNOWLEDGEMENT

Prior to the first foundation inspection of any new building, and prior to the first foundation inspection of any addition to an existing building located within a distance of three (3) feet or less of a property line, **a written statement prepared and signed by a registered civil engineer licensed to practice land surveying or a licensed land surveyor shall be submitted to the Chief Building Official** stating that under penalty of perjury said civil engineer or land surveyor is familiar with the rough grade elevations and building location requirements shown on the approved plans, that said civil engineer or land surveyor has surveyed the site including rough grade elevations and building foundation location, and that the building foundation location and rough grade elevations are in substantial compliance with the plans approved by the City of La Mesa.

The purpose of the survey requirement is to set the minimum points necessary to establish controls for the project.

It is extremely important that the project contractor contact the Grading Inspection Section of the Engineering Division at (619) 667-1151, 48 hours PRIOR to commencement of the grading operation. This notification is required in order to avoid any potential delay of building foundation inspection and/or approval of Building Location Verification Survey. If you have any questions, please contact David Laslo at (619) 667-1151 or Aaron Sturm at (619) 667-1169.

I have read and understand the survey and notification requirements described above.
